

Et OH

THIS IS THE FUTURE OF SPIRITS

THIS IS NOT WHISKY

Imagine if you could rethink and challenge the old and slow spirits industry

We bring *innovation, science, control and precision* to matured spirits beyond what is currently achievable. We can recreate years of aging in just a few days.

The spirit industry, and especially the whisky industry, is **stuck** in tradition and slow production.

Our *unique process* and technology makes it easy for us to achieve aspired flavours tailored to the **desired taste palate**

We offer a new way of accessing required and novel flavours swiftly and accurate. This makes it easy for us to *collaborate* with **key partners** fast and efficiently.

The Future of Spirits

Revolutionising the production of aged spirits into a **greener future**

0% wasted product. Not a drop is wasted compared to traditional methods with angels share

95% less wood used when using our process. We don't require coopers to build barrels. We can source any fibrous woody material for our spirits.

We bring flavour to the table through precision and control

We transform raw spirits into **mature complex and flavourful masterpieces** by combining several high-tech acceleration techniques.

Our **results are proven** thanks to numerous reports and articles made in collaboration with the University of Copenhagen.

PRICE AND PROFIT

*What we save in
time we invest in
flavour*

Aging time

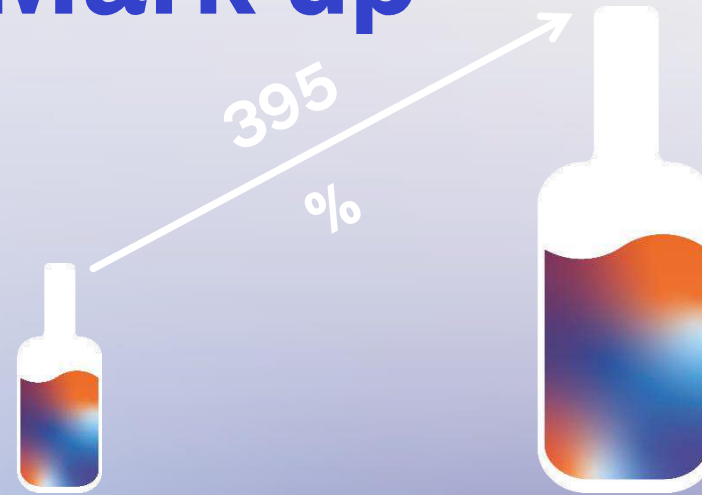

Aging costs

Less than 1 EUR pr liter of processed spirit

99% less capex when aging for 12 days vs 3 years

Mark up

Our technology enables us to value-add bulk spirits with 395% markup with less capital tied up.

WHISKY OF THE MONTH

MARCH 2022

"It is truly an excellent whisky even though it isn't a whisky"

- No Nonsense Whisky

This is / MEGA/ delish! If you get a chance make sure you grab a bottle

- Alex Kratena

Multi-award winning bartender and co-founder of P(OUR)

How is the result then? Well, unexpectedly good. [...] The barrel character is surprisingly good, and the wood integration is quite nice.

- Whisky & Magazine

Danish Whisky Magazine

What they are producing is really, really fascinating

- No Nonsense Whisky

Youtube Whisky reviewer

It's feels like playing the harp on a synthesizer.

- Product tester

Let's just go for it. An all-in leap of faith with zero prejudice. Honestly? This is delicious!

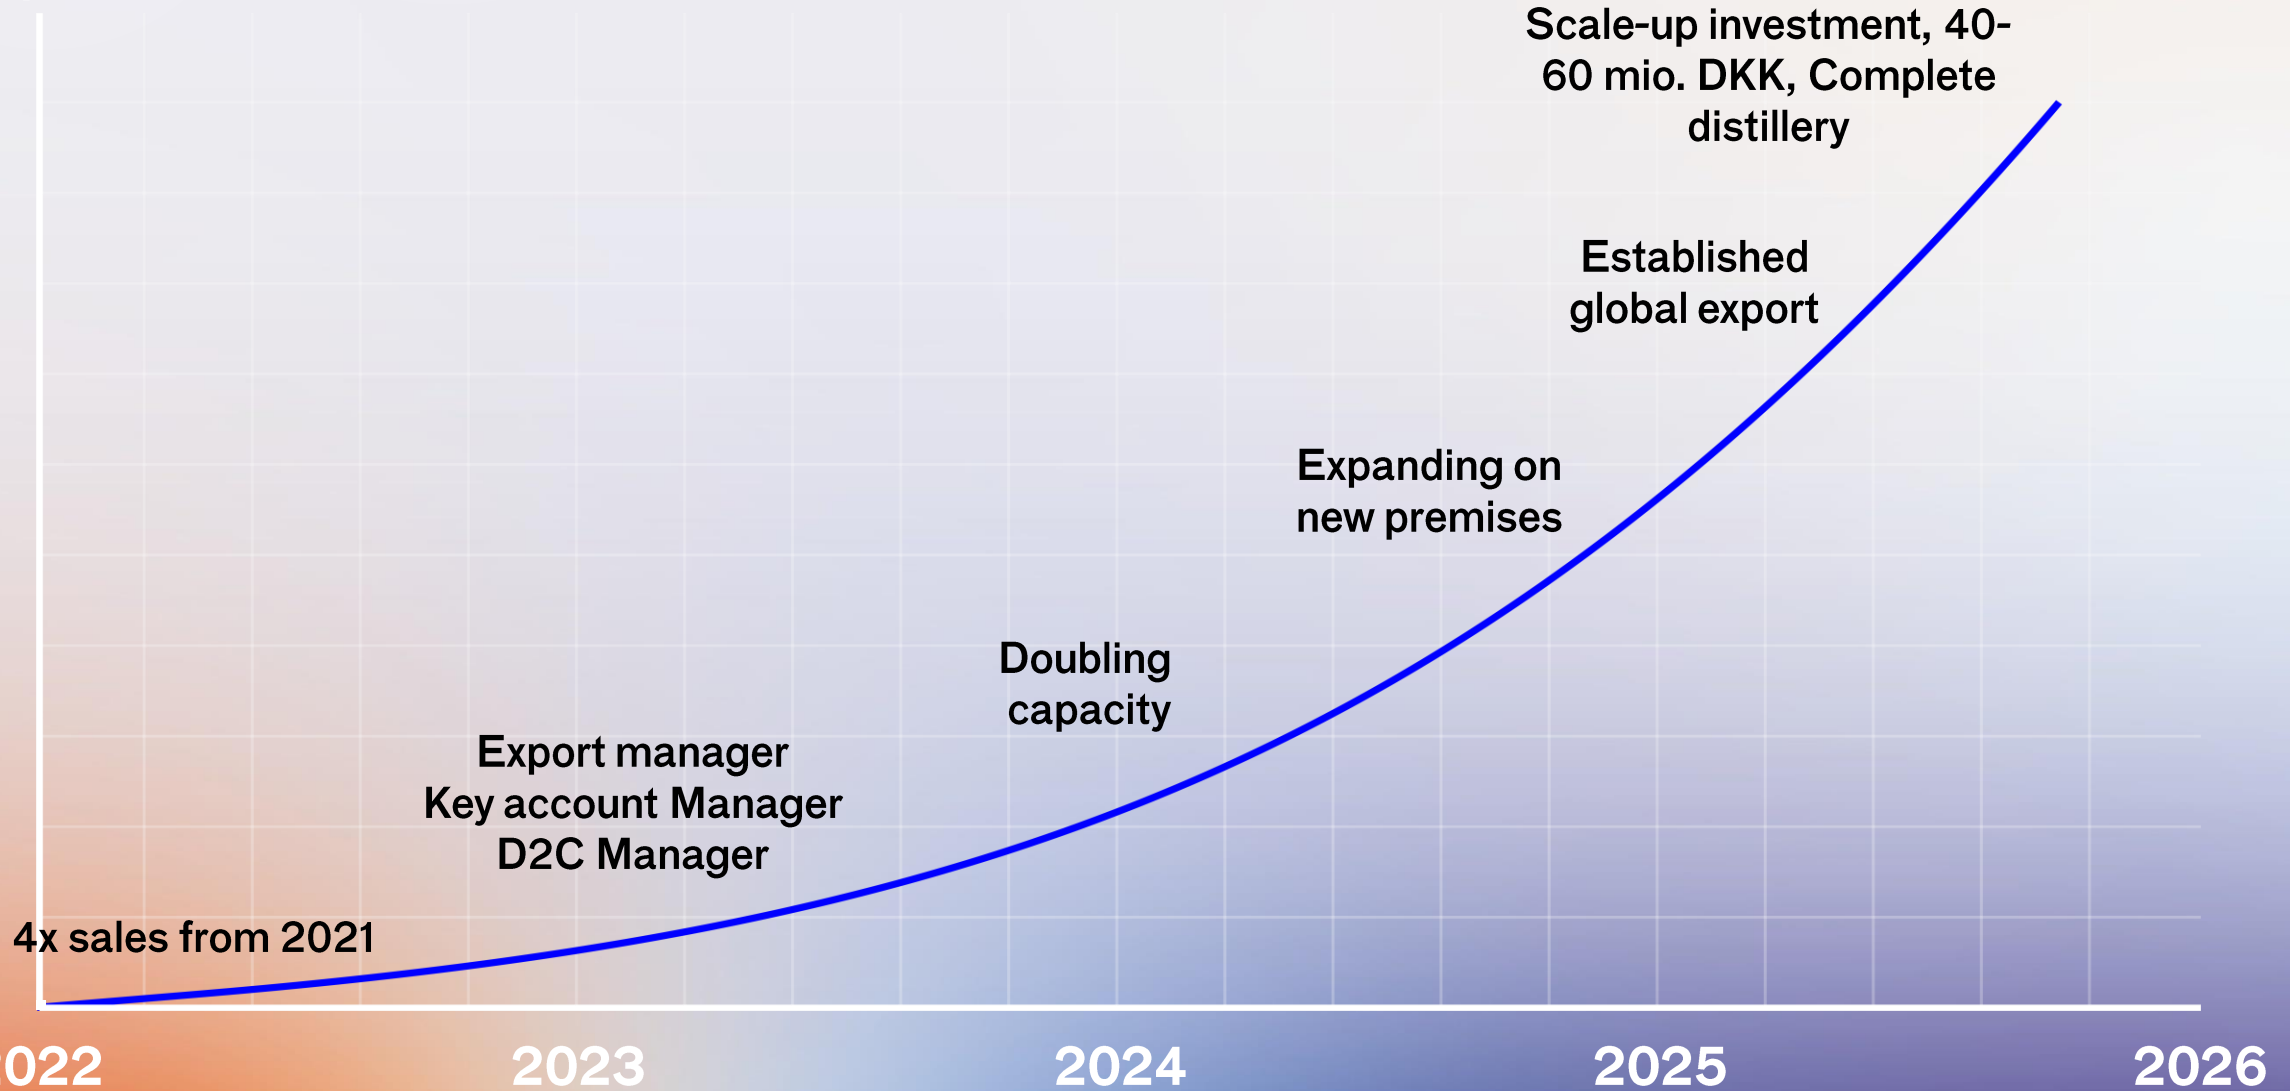

- Confessions Of A Whisky Freak

Youtube channel and whisky reviewer

EUR

BOARD POTENTIAL

Market Developers

We need to unlock new potential markets and clients. We need a board member with reach and the potential to unlock possible opportunities.

Strategists

We need input as to where to put our focus and concentrate our strengths. We can accept a burn rate but burning without purpose is not for the greater good for the company. We need smart money.

Generalists

Working within the spirits industry is a different experience than our previous experience in the foodbev industry. We are always on the lookout for a smart brain to help us develop our business and business models.

Thank you
